VALVE & CURB BOX CLEANERS

Valve and curb boxes frequently get filled up with dirt, stones and other foreign objects that prevent keys from accessing valves or curb stops. This heavy-duty tool is designed for cleaning out 2-1/2" and 3" Buffalo curb boxes as well as 4-1/4" & 5-1/4" Buffalo valve boxes, without excavation.

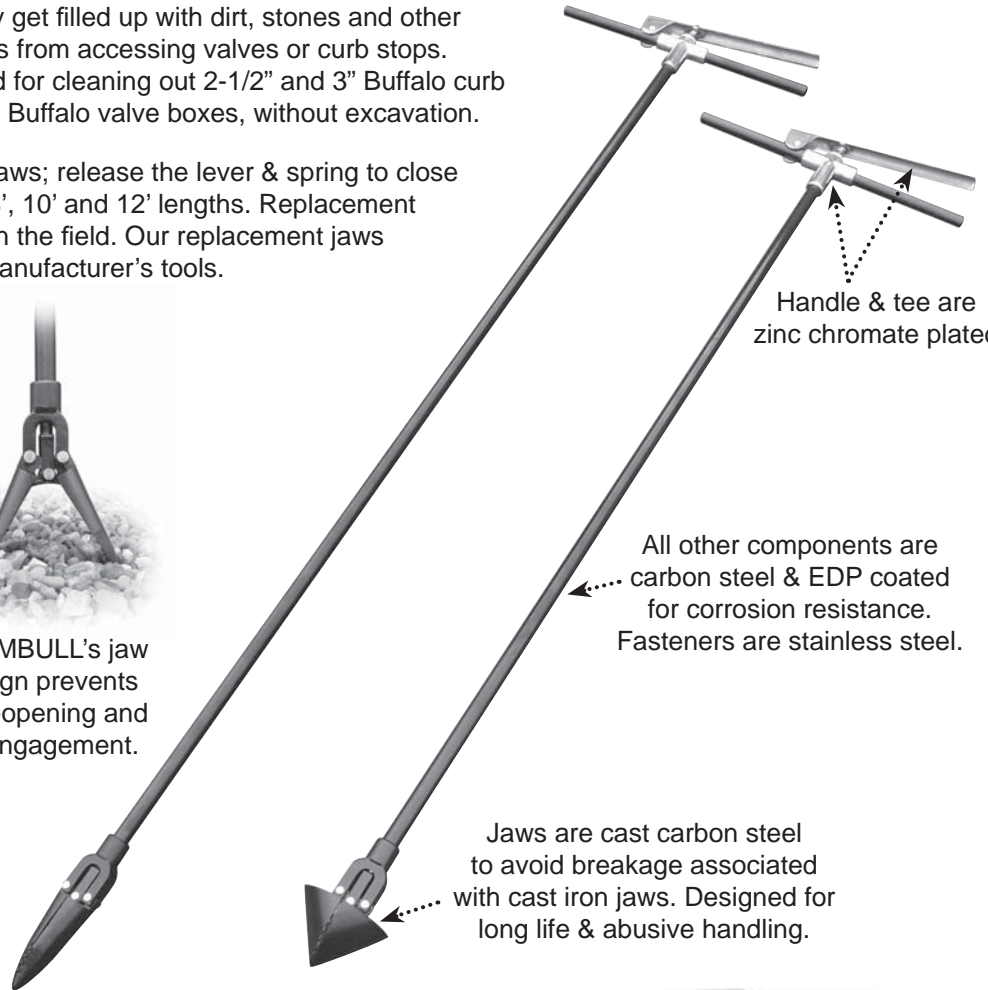

Squeeze the lever to open the jaws; release the lever & spring to close the jaws. Available in 5', 6', 7', 8', 10' and 12' lengths. Replacement jaw kits can easily be installed in the field. Our replacement jaws can be interchanged on most manufacturer's tools.

Competitive models can "over-open" and become disengaged, requiring the tool to be removed from the box and be adjusted back into place.

TRUMBULL's jaw design prevents over-opening and disengagement.

Handle & tee are zinc chromate plated

All other components are carbon steel & EDP coated for corrosion resistance. Fasteners are stainless steel.

Jaws are cast carbon steel to avoid breakage associated with cast iron jaws. Designed for long life & abusive handling.

STANDARD JAWS
 remove small objects, dirt, stones, sand & mud.

SCOOP JAWS
 are designed to remove large amounts of debris, sand & mud.
