TRUMBULL RATCHET BOX WRENCH ENCLOSED HEAVY DUTY DESIGN

Our heavy-duty, ratcheting, box end wrench can tighten nuts on long bolts or all-thread rod without bottoming out and has a simple flip-over reverse feature. They have no loose sockets that can be misplaced and the enclosed design prevents rocks, pebbles or debris from entering the mechanism.

The small end has a 1-1/16" socket which fits heavy hex nuts on 5/8" bolts, used on clamps, couplings, saddles and 3" Mechanical Joints.

The large end has a 1-1/4" socket which fits heavy hex nuts on 3/4" bolts, used on 4" thru 24" Mechanical Joints.

Compare

Our improved design

Enclosed design keeps debris from jamming the mechanism.

Triple rivets keep plates from spreading under your heaviest tightening job.

Competitive design

Open design allows debris to jam mechanism.

Single rivet provides less protection against side plates from spreading and possible failure.
