## TRUMBULL SOIL PROBE RODS

Used in locating buried lines.

Offered in both insulated and non-insulated styles.

Insulated Probe Rod features non-conducting, molded rubber handle and shield on upper section of shaft. Molded rubber coverings have been laboratory tested to assure protection against electrical shock from accidental contact with buried **secondary** electrical lines. Note: The insulation will not provide protection against contact with **primary** voltages. Please consult your local utility for locations of underground primary lines. Handle is 1-3/16" diameter x 9-1/2" long.

Trumbull Soil Probe Rods are stocked in two lengths:

Overall Length	Insulated		Welded	
	Trumbull Item No.	Weight	Trumbull Item No.	Weight
4'	367-9080	4 lb.	367-9081	4 lb.
5'	367-9090	4-1/4 lb.	367-9091	4-1/4 lb.
Tip	367-9095	-		

**Always consult power company for existence of underground electrical lines before digging.**
