Suggested Specifications, Floor Boxes

Floor Boxes shall be constructed of Class 30 cast iron. They shall include a bronze bushing with an inside diameter 1/16" larger than the outside diameter of the extension stem and shall be retained with two stainless steel screws. The overall height of the floor box shall be 6". The underside of the casting shall have 2-1/2" female threads to accept a pipe nipple, to extend the length for thicker floor slabs. Floor boxes shall be provided with a drop-in cast iron lid. When specified, or shown on the drawings, floor boxes shall be provided with a bolt-down lid and O-Ring, to seal the floor box from the top side. When specified or shown on the drawings, floor boxes shall be provided with a packing gland, to seal the floor box from the underside.

Unless otherwise specified, all floor boxes shall be provided with a valve position indicator.

Floor boxes shall be as manufactured by Trumbull Industries, Youngstown, Ohio.
