

PIPE PENETRATION SLEEVES

MATERIAL - MODEL TMPPSHDPE

NON-STOCK PRODUCT - MADE TO ORDER

DESCRIPTION:

Pipe Penetration Sleeves are used to create circular sleeved holes in concrete poured barriers including walls, floors, ceilings, structural supports and tank footings.

- Molded from HDPE; lightweight, non-conductive, impact resistant, resists water migration
- Adjusts to wall thickness
- Nailer end caps position sleeve in form
- Standard sleeves are 16" in length
- Sleeves can be cut shorter on site with hand tools; longer lengths are available upon request.
