

# STAINLESS STEEL CHAINWHEELS

## 316 STAINLESS STEEL - MODEL TMPTCSS

### DESCRIPTION:

Stainless Steel Chainwheels allow operation of valves, actuators, or gear boxes in high, hard-to-reach locations by means of a slight pull on the chain. These are Pocket-Type chainwheels which use specifically calibrated machine chain and connecting links.

These chainwheels are furnished with stainless steel hardware for clamping to a handwheel or can be pinned directly to a stem with optional Star Adapter.

To prevent serious injury, we recommend the use of our Secondary Safety Restraint System.

#### TRUMBULL CALIBRATED MACHINE CHAIN

Description	Weight
316L SS Machine Chain	0.35 lbs./ft.
SS Connecting Link	0.05 lbs.
Order Length of chain required and connecting link	

#### STAINLESS STEEL CHAINWHEELS

Size No.	Diameter	Boxed Weight	Handwheel Range Chainwheel will Fit**	Bore*** Diameter	Chain Length (2X Drop)
