COMPOSITE and POLYMER Meter Box Lids

Allow Radio Signals to be Read in AMR and AMI Systems

- RETAINER BRACKET: for installation of antennas under lid, see page 8.
- SLIP-RESISTANT SURFACE: ADA Compliant.
- COUNTERBORES: available for “through-the-lid” antenna mounting (see page 6 and 7).
- POSTS ON UNDERSIDE: allow for attachment of retainer bracket (see below), Aclara MTU, and adapters for Itron 100W, Itron Riva and Badger LTE (shown on page 8).
- COMPOSITE: COMPRESSION MOLDED
- POLYMER: INJECTION MOLDED
- Our Lids are UV resistant
- COMPRESSION MOLDED: INJECTION MOLDED
- SLIP-RESISTANT SURFACE: ADA Compliant
- COUNTERBORES: available for “through-the-lid” antenna mounting (see page 6 and 7).
- POSTS ON UNDERSIDE: allow for attachment of retainer bracket (see below), Aclara MTU, and adapters for Itron 100W, Itron Riva and Badger LTE (shown on page 8).
- COMPOSITE: COMPRESSION MOLDED
- POLYMER: INJECTION MOLDED
- Our Lids are UV resistant
- COMPRESSION MOLDED: INJECTION MOLDED
- SLIP-RESISTANT SURFACE: ADA Compliant
- COUNTERBORES: available for “through-the-lid” antenna mounting (see page 6 and 7).
- POSTS ON UNDERSIDE: allow for attachment of retainer bracket (see below), Aclara MTU, and adapters for Itron 100W, Itron Riva and Badger LTE (shown on page 8).

- WORM GEAR*: has square opening to reduce localized stress on pentagon bolt.
- STAINLESS HARDWARE: retains worm gear assembly and allows for easy field replacement.
- BRASS SLEEVE & BEARING WASHER: prevents wear and elongation of hole for pentagon bolt.
- PENTAGON BOLT: square shank
- Ductile Worm Gear Assembly

* For Polymer Lids, worm gears normally furnished as high-strength polymer.

Also Available:
- Other sizes and shapes (such as oval or rectangular)
- Custom lettering
- Alternate locking mechanisms
- Nylon and DI worm gears
- Snap-in adapter for Itron 100W
- Large pentagon bolt
- Magnet for detection with valve and curb box locators

For dimensions, load ratings and additional options, refer to the product information chart on pages 10 - 27.
POLYMER Meter Pit Frames

Fits on 18", 20" and 21" Meter Pits

Can be used with most common meter pits used today.

Strength of gusseted Polymer Frame is greater than most cast iron frames.

Polymer Frame accepts all Trumbull 12-1/4" OD Type-A Lids, even those with counterbores for antenna mounting (counterbores shown on page 6).

POLYMER FRAME accepts all Trumbull 12-1/4" OD Type-A lids

REBAR TABS accept rebar sizes up to 3/8"

TOP VIEW

**12.25" Polymer Frame**

(11.4" Clear Opening)

Drawn to Scale

**Notes:**
1. Material: Thermoplastic (black)
2. Weight: 8.1 lbs.
3. Fits all Trumbull 12.25" OD lids
4. Part Number: 367-5464

COMPOSITE Manhole Lids for Large Meter Settings

Vaults for large meters are typically accessed through cast iron Manhole Lids. Trumbull offers a variety of Composite Manhole Lids through 36” diameter rated for 40,000 lb. traffic loads. Composite lids are “radio-friendly” and light weight, reducing back and finger injuries. They also reduce thefts common with cast iron lids.

Custom lettering and graphics available.

COMPOSITE Lids for Coiled Pit Setters

Worm gears on pit lids typically engage the shelf of an iron frame that covers the entire circumference of the frame. However, coiled pit setters use two brackets that must be engaged to lock the lid in place. Trumbull Lids are designed with cutouts to clear the brackets of Pit Setters. Available with ductile iron or UHMWPE worm gears.

Illustrated here is an 18” AY McDonald Pit Setter Lid.

LIDS are designed and manufactured by Trumbull Manufacturing, not AY McDonald or Mueller.

ALIGNMENT MARKS on top of lid help installer find the correct position for hook and work gear to lock lids to brackets in pit setter pipe. US Patent #9,350,148.

* See chart on page 12 for other options for 15” lids, and page 22 for options for 18” lids.

Drilling holes in existing cast iron lids may save money in the short run. However, most iron lids do not have the thickness for a counterbore. If lids are simply drilled without a counterbore, the result is a trip hazard. Drilling iron lids in the field frequently results in cracks in the lid.

**SOLUTION:**
Our lids feature a molded **COUNTERBORE** allowing recessed installation of antenna to eliminate trip hazard or damage.

**CURRENT COUNTERBORE OPTIONS**

**NEW**

**INQUIRE ABOUT CUSTOM OPTIONS**

For dimensions, load ratings and additional options, refer to the product information chart on pages 10 - 27.
NEPTUNE COUNTERBORES

EASY TRANSITION of Neptune Antennas

"FIGURE 8" SHAPE allows Neptune users to transition from touch read to radio read antennas.

BLUE COLOR LIDS

Available for our Polymer Lids and Composite Lids. Minimum order quantities apply.

CUSTOM LID OPTIONS

CUSTOM LOGOS
CUSTOM LETTERING
SECURITY BOLTS (see page 45)
CUSTOM SHAPES
COUNTERBORES (see page 6)

Composite frames are shown on pages 39 - 42.

For dimensions, load ratings and additional options, refer to the product information chart on pages 10 - 27.
Itron Riva Post Adapter
US Patent No. D842,085

Aclara posts allow Aclara MTU to be mounted directly with two stainless steel screws

Badger LTE Post Adapter

Badger LTE endpoint with Trumbull Retainer Bracket & Badger through-the-lid adapter

For a variety of ENDPOINTS

For dimensions, load ratings and additional options, refer to the product information chart on pages 10 - 27.
LID FASTENING STYLES

Worm Gear
Worm gear locks to shelf on frame. Cast iron or polymer.

Bolt-Down Style
Our Frame and Cover Assemblies have threaded inserts in the frame to accept stainless screws (see page 29 & 31) or optional security screws (see page 45).

Quarter-Turn Double Paddle Lock Style
Two paddles on opposite sides of the lid lock into slots in frame. Also offered as an alternative to bolt-down style Frame and Cover Assemblies.

REDUCING RINGS

FABRICATED REDUCING RINGS are customized to permit a standard lid size to fit a non-standard frame size. Ideal when time constraints or small quantities make a new mold impractical.

For dimensions, load ratings and additional options, refer to the product information chart on pages 10 - 27.

20,000 lbs. load rated Lids marked “WATER METER” are continued on the following page.
20,000 lbs. lids normally furnished with nylon worm gear. Also available with ductile worm gear.
- Lids are normally furnished with standard (27/32") pentagon bolt. Also available with large (1-1/32") pentagon bolt.
- Lids normally furnished marked “WATER METER”. Special lettering available, please inquire.
- All lids with counterbore (CBORE) have thru hole diameter of 1.88”.
- Bearing washers located above and below 20,000 lbs. lids are UHMWPE.
- Frames other than Trumbull Composite or Polymer models are shown for illustration purposes only.
- For explanation of asterisk (*) and dash (⁻) points for our lids, see “Additional Notes” on page 27.

Frame and Cover Assemblies are sealed by an EPDM gasket.

Bolt down lids are secured to frames with four Xylan coated stainless screws, see page 45 for optional security screws.

To refer to antenna mounting options, see “Additional Notes” on page 27.

Available 3rd Quarter 2020.

50,000 lbs. load rated Frame and Cover Assemblies marked “WATER METER” are continued on the following page.
Lids normally furnished marked “WATER METER”. Special lettering available, please inquire.

Frame and Cover Assemblies are sealed by an EPDM gasket.

Bolt down lids are secured to frames with four Xylan coated stainless screws, see page 45 for optional security screws.

To refer to antenna mounting options, see “Additional Notes” below.

### “ADDITIONAL NOTES” for Trumbull Meter and Manhole Lids

- **Underside of solid lids provide the following options to mount antenna:**
  1. A Trumbull retainer bracket can be mounted to the underside of lid to hold a flow monitoring device or other equipment.
  2. Post adapters, screwed to one post on the lid:
     - **ITRON 100W ADAPTER**, item #367-5796 (snap in design)
     - **ITRON RIVA ADAPTER**, item #167-5000 (snap in design)
     - **BADGER LTE ADAPTER**, item #367-5000

- **Neptune (figure 8) holes accepts either Neptune Touch Read or R900 antennas.**

- **X-Frame style lids available with Neptune, Badger, Sensus and Itron holes and counterbore. Lids will seat, but not hinge.**

- **Slots need to be cut or ground into existing frame in order for the paddle locks to lock in frame.**

- **For 15” Lids requiring “through the lid” mounting, please inquire regarding load rating requirements.**

- **A ductile iron worm gear is required when cover is used with an iron frame, and UHMWPE worm gear when used with composite frame.**
Composite Manhole Lids
For Sanitary Sewer

Trumbull Composite Manhole Lids are today’s smart choice for highway use in place of cast iron lids. They have been successfully tested to a minimum of 40,000 lb. proof load per AASHTO M-306, H-20. Test reports from independent lab are available upon request.

Composite lids have no scrap value, deterring theft common to iron lids. These lids are much lighter than cast iron lids, yet are rated for traffic loads. Use composite lids to avoid back and finger injuries associated with cast iron lids. Lids also have a slip-resistant, anti-skid pattern.

LOAD TESTED PER AASHTO M-306, H-20 – 40,000 lbs. (See page 38 for details on load testing)

Composites have no scrap value, so they reduce theft problem common to cast iron lids.

The light weight of composites reduces finger and back injuries.

Rated for traffic loads, and tested in excess of 40,000 lbs.

Signals from flow monitoring devices pass through our Composite Lids!

WORM GEAR secures lid to frame and is operated with stainless steel pentagon bolt and hardware; other locking options available upon request.

CUSTOM MOUNTING available for flow monitoring devices

For compatible Trumbull Composite Frames, see pages 39 - 42.
For dimensions, load ratings and additional options, refer to the product information chart on pages 46 - 49.
Composite Manhole Frame and Cover Assembly
21-1/2" Clear Opening
23-3/4" Lid OD – EPDM Sealed

- Composite design can pass a 50,000 lb. proof load test per AASHTO M-306, H-25, yet weighs only one-third of comparable cast iron frame and lid, reducing back and finger injuries.
- All hardware is stainless steel, along with the composite construction provides corrosion resistance.
- Fasteners on underside to attach flow monitoring/leak detection devices.

Comes with a 50,000 lb. proof load test, weighs one-third of comparable cast iron, and features stainless steel hardware.

The M-306 Standard

The American Association of State Highway and Transportation Officials (AASHTO) developed a standard, M-306, that calls for proof load testing of iron castings. For an H-20 proof load test, that standard requires a 40,000 lb. load to be applied to a 9” x 9” square plate for one minute. Any cracks or permanent deformation greater than 1/8” are cause for rejection.

Polymer and Composite Lids

Polymer and composite lids are used for a variety of applications, such as:

- Water meter pits and manholes, where existing cast iron lids blocked radio signals from radio read meters.
- Flow monitoring devices in manholes, where signals of rising flow levels are likewise blocked by cast iron lids.
- Theft, due to the scrap value of iron.
- In industrial and sanitary manholes to reduce finger and back injuries, due to their light weight.

How the M-306 Standard Relates to Polymer and Composite Lids

Municipalities and Engineers wanting a traffic rated polymer lid frequently specify an “H-20” rating in their specifications. There can be confusion since AASHTO published bridge design criteria, known as H-20, which calls for truck axle loading of 32,000 lbs., or 16,000 lbs. per wheel load. The AASHTO M-306 standard calls for a safety factor of 2.5 to be applied to the 16,000 lbs. wheel load (2.5 x 16,000 = 40,000 lbs.). Therefore, for H-20 rated lids, a 40,000 lbs. proof load test is required. For H-25 rated lids, a 50,000 lbs. proof load test is required.

Explanation of the Confusion

Many water departments began to install radio read meters but couldn't get a good read through cast iron lids. Frequently, many were only thinking of a radio-friendly material such as polymer, without giving much thought to its strength. As a result, many municipalities received thin plastic lids that could only withstand a proof load test of 5,000 lbs., or less. Frequently, breakage occurred from lawn tractors and other loads. To be conservative and have an industry standard they can specify, many municipalities require a 40,000 lbs. proof load test, even where a lid is not in the roadway. Some suppliers advertise their lids as H-20, but are referring to a 16,000 lbs. wheel load and not a 40,000 lbs. proof load test. Some furnish lids that cannot even meet the 16,000 lbs. load they advertise as “H-20”.

How to Avoid the Confusion

To avoid confusion, your specs should require the proof load test you specify, conducted per AASHTO M-306. To be safe, require a report from an independent test lab. Simply specifying “H-20” may not provide the safety factor you need, particularly where traffic loads are involved. The AASHTO M-306 standard requires the load to be placed at the center of the lid and not transfer any of the load directly to the frame. For smaller lids, such as 12” diameter, a plate smaller than 9” x 9” must be used. If you would like a proof load test performed on the lids you are using, contact the Engineering Department here at Trumbull.
Composite Manhole Frames and Covers

Worm Gear Style – For Use with 25-1/2" x 1-1/4" Covers

- Composite design can pass a 40,000 lbs. proof load test per AASHTO M-306, H-20, yet weighs only one-third of comparable cast iron frame, reducing back and finger injuries.
- Frame’s composite construction provides corrosion resistance, making it suitable for both water and sewer applications.

**EPDM SEAL** prevents infiltration

**4 WORM GEAR RECESSES** allow cover to be placed in any of 4 directions

**WIDE FLANGE DIAMETER**

**FRAME SLOTS** allow easy handling and anchoring to manhole

Composite Oval Remote Antenna Box

13.42” x 9.29” Lid Size – Sold Complete with Box and Lid Together

The Oval Remote Antenna Box provides a good solution to house endpoints when replacement composite lids are not available to replace the larger cast iron lid.

Designed to accept up to 3 Badger endpoints in the box, rather than attached to the lid, reducing the chance of ripping wires when removing lids.

Made of durable SMC composite material. Box and solid lid are rated for a 40,000 lbs. test load, per AASHTO M-306, H-20. For load ratings with antenna holes through the lid, please inquire.

Vault with Remote Antenna Box.

Lid is attached to box with a non-locking pivot bolt.

Lid closes flush with top edge of box.

ADAPTER RECESSES allow up to 3 Badger adapters to be mounted below the lid

Ductile Iron Meter Box Cover
Accepts All Trumbull 12-1/4” OD Lids

Trumbull double lid Meter Box Covers provide both physical and frost protection for underground meters. The insulating air space captured in the ductile iron base casting, between the lid and the plastic frost liner, helps keep the ground heat inside the meter chamber to reduce the chance of freezing. The internal plastic frost liner is molded with a central hub to permit easy removal.

Use of frost liner is not compatible with most antenna mountings. Consult your Trumbull Rep for more info.

### New Cover Details

**LETTERING**

- [ ] "SANITARY SEWER"
- [ ] "WATER METER"
- [ ] Other

**LOAD RATING REQUIRED**

- [ ] Heavy Duty AASHTO M306, H-20; 40,000 lbs.
- [ ] Medium Duty; 20,000 lbs.
- [ ] Light Duty; 5,000 lbs.

**AMI/AMR Antenna & Leak Detection Mounting**

- [ ] Bracket mounting on underside
- [ ] Through-the-lid, flush with grade
- [ ] Mfg & model of endpoint

</table>
Our product categories include waterworks tools, valve position indicators, polywrap, joint restraints products, meter pit lids and couplings, valve and curb box accessories, as well as valves and accessories for water/wastewater treatment plants.

We specialize in unique and customized accessories for the valve market. We have pioneered cast stainless valve accessories such as stainless chainwheels, floorstands, wall brackets and stem guides. Other innovations include our valve position indicators and cast stainless mud valves that have been thoughtfully designed to meet the highest expectations of Engineers and Operators. Trumbull Manufacturing is a leader in providing thermoplastic and composite lids for water meter changeout programs, as well as composite manhole frames and covers.

We stand behind our product with experienced Engineering, Quality Control and Field Service personnel. Our products are designed for long life, and are rigorously tested, in-house and at independent labs. Our inside sales staff is passionate about customer satisfaction, contact them today.
