SPECIALTY

TOOLS

FOR THE VALVE AND

**WATERWORKS
INDUSTRY**

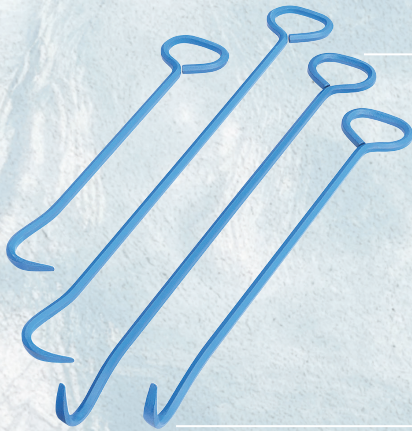

DOUBLE SOCKET RATCHET WRENCHES

- 3 wrenches operate 3/4", 7/8", 15/16", 1-1/16", 1-1/8", and 1-1/4" hex nuts
- Ratchet mechanisms are enclosed between two thick steel plates
- Simple lever-operated reverse feature
- Ergonomically contoured grips are color-coded
- Can tighten nuts on long bolts or all-thread rod without bottoming out
- 3-wrench set includes sturdy carrying case and a diameter tape

PIVOTING HANDLE DOUBLE SOCKET RATCHET WRENCH

- Adjustable handle ideal for reaching bottom bolts on joints or cast couplings
- Double socket permits use on either 5/8" or 3/4" heavy hex nuts without changing sockets
- Oiler feature allows for easy lubrication without disassembly

MANHOLE COVER HOOKS

- Made of 5/8" hexagonal chrome alloy steel
- Painted with Safety Blue enamel coating that resists rusting
- 1/2" point engages the lid of the manhole cover
- Available with point in line with handle, in 24" and 36" lengths
- Also available with point 90 degrees from handle, in 30" and 36" lengths

HYDRANT WRENCHES

- Non-adjustable one-piece ductile iron casting with enamel coating
- Available with square or pentagon opening which fits specific operating nut size
- Ideal for square operating nuts
- 15" overall length
- Also serves as a spanner wrench to attach or remove hose couplings (both pin and rocker types)

ADJUSTABLE HYDRANT WRENCH

- 16" long, high-tensile steel handle with knurled grip
- Fits pentagon nuts up to 1-1/2" (point to flat) and square nuts up to 1-1/4" (flat to flat)
- Spanner fits both lug and pin styles of hose couplings
- Zinc chromate finish over the entire wrench provides corrosion resistance
- Optional 24" handle available for increased leverage, purchased separately

ADJUSTABLE STORZ HYDRANT WRENCH

- Works on 4" and 5" Storz heads and both rocker lug or pin lug fittings
- Bronze wedge nut helps grip a variety of sizes and shapes of operating nuts, especially square
- Accommodates pentagon operating nuts up to 1-3/4" and square operating nuts up to 1-1/4"
- Head is cast steel, handle is made of high-tensile steel

MAIN VALVE KEYS

- Available in Tee-handle, ring handle and telescoping models
- Shafts of Tee-handle and ring handle models made of 1" Schedule 40 steel pipe
- Investment cast steel socket fits 2" square operating nut and features mud slots
- Stocked in lengths 2' through 8' ... available in other lengths by special order

SPEED WRENCH OR HANDWHEEL FOR 2" AWWA NUT

- Alternatives to Tee-handle valve keys
- Ideal for operating valves with 2" AWWA nut, either in the trench or in the yard
- Both allow use of both hands for extra leverage
- SPEED WRENCH: includes spinner handle that provides for quick opening and closing
- HANDWHEEL: all ductile iron assembly that includes locking jam screw and nut

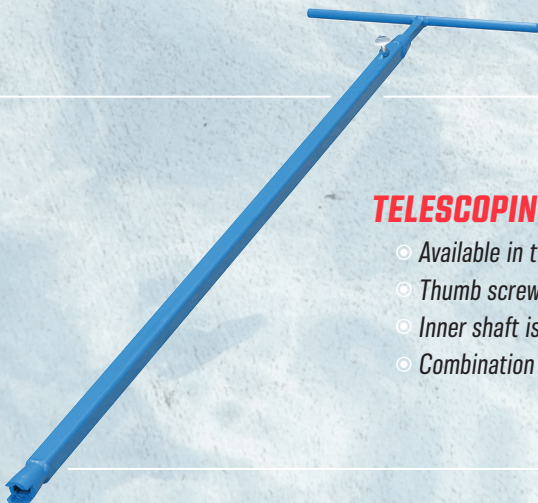

CURB STOP WRENCHES

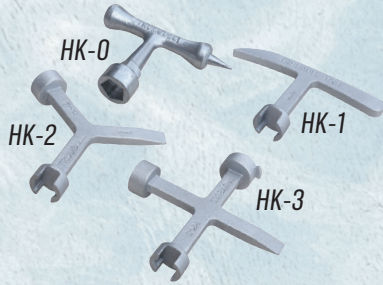

- Designed to shut off 3/4" through 2" curb stops, and fits directly on tee head of curb stops
- Made of 5/8" round carbon steel with a ductile iron end casting

TELESCOPING CURB STOP WRENCHES

- Available in two size ranges: 4'6" to 8' and 6' to 10'
- Thumb screw allows for infinitely variable adjustment within the size range of each model
- Inner shaft is 1/2" solid square rod, outer shaft is 5/8" square tubing
- Combination socket bottom casting

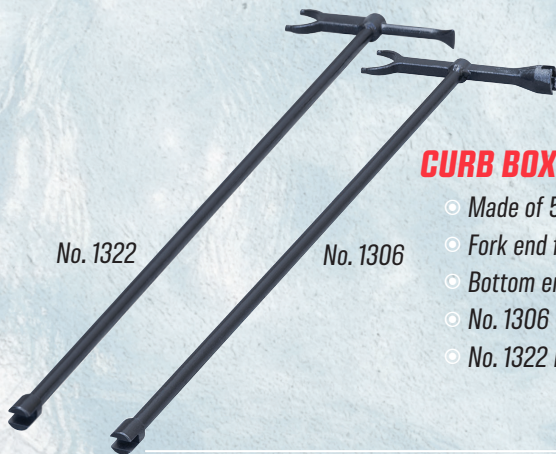

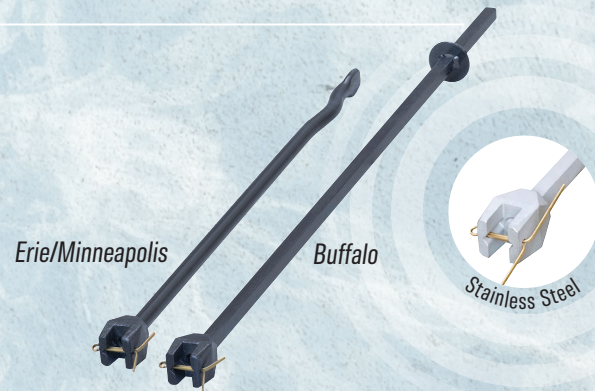

PENTAGON HAND KEYS

- Slots in pentagon fit tee heads of meter and curb stops
- Made of high-strength plated carbon steel
- HK-0 and HK-1 fit standard pentagon heads; HK-2 fits standard and large pentagon heads
- HK-3 fits standard pentagon heads; Mueller meter box lids with 1-1/16" pentagon and lid

CURB BOX RODS

- Buffalo type and Erie/Minneapolis types both available
- Available in ductile iron or stainless steel models
- Furnished standard with brass cotter pin

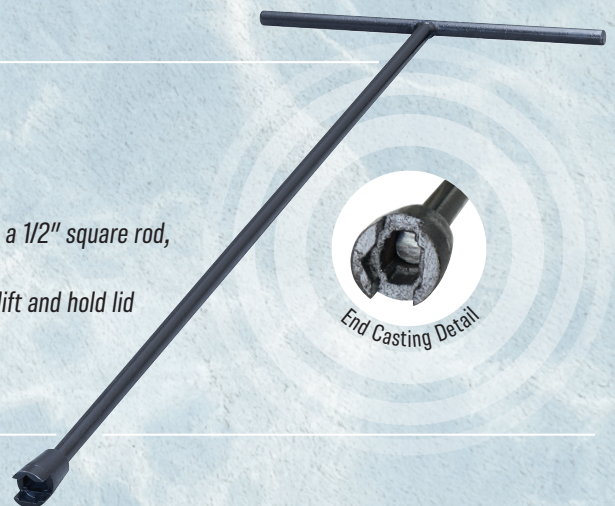

CURB BOX KEYS

- Made of 5/8" carbon steel
- Fork end fits in a curb box lid with two holes
- Bottom end is slotted for use on rod inside 1" pipe upper section
- No. 1306 includes socket end that fits the plug in a curb box lid with a pentagon nut
- No. 1322 includes pick end which is used to clear ice and dirt from the box lid

COMBINATION CURB BOX KEYS

- Made of 5/8" round carbon steel with ductile iron combination casting
- Casting is a multi-purpose tool, it can be used on a pentagon nut as well as a 1/2" square rod, and will fit directly on the tee head of a curb stop
- When used on pentagon bolt of meter box covers automatically attaches to lift and hold lid
- Available with plain handle (No. 1305) or with point/chisel ends (No. 1321)

METER WRENCH

- Used to install and remove meter couplings in buried meter boxes and meter pits
- Investment steel casting and steel tubing with EDP coating
- 16" handle allows worker easy access into the confined areas of meter boxes and meter pits
- Works with 1/2" through 1-1/2" meter couplings
- Features include resilient grip and replaceable, heat treated tool steel gripping jaw and anvil

SOIL PROBE RODS

- Used to help locate buried lines
- Available in welded steel and non-conducting insulated type tee handle
- Insulated type includes non-conducting upper section of shaft and alloy steel, replaceable tip
- Stocked in both 4' and 5' lengths

PIPE DIAMETER TAPES

- Front side of tape measures the pipe's outside diameter and the back side measures the pipe's length
- OD chart furnished on the back of tape case
- Available with your custom logo to advertise your company (minimum quantities apply)
- Pipe Diameter Tapes available in either inch or metric measurements
- 10' long tape can measure the outside diameters of pipe, up to and including 36" ductile iron pipe

The KnuckleSAVER™ 3-IN-1 FLARING TOOLS

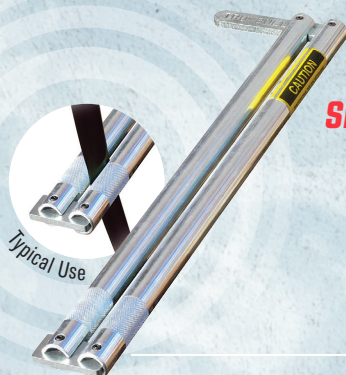

- Provides safety from injuries when flaring soft copper tubing
- Shank is drilled out and provided with a pressure relieving hole on the side to allow use with lines that cannot be shut down
- Long shank helps re-round kinked or bent copper
- Ideal to re-round copper used with compression brass

DISTANCE MEASURING WHEELS

- Lightweight design with folding handle that fits neatly inside carry bag
- Six-figure counter records long distances up to 100,000 ft. over most types of terrain
- Internal axle bearings provide long life under a wide variety of applications
- Hand-grip brake eliminates unwanted measurement at turns or around objects

SHUTOFF TOOL for Polyethylene Water Tubing

- Used in making emergency shutoffs where curb stops or other valves are not readily accessible
- Hinged on one end to allow tool to open for use on 3/4" and 1" tubing
- NOT intended for use on gas tubing!

VALVE AND CURB KEY KIT

- Operates main valves, curb and meter stops, and a variety of curb box rods and lids
- Tool collapses to compact length for convenient storage in utility vehicles
- Carrying case included

Related Product

OPTIONAL ACCESSORIES FOR VALVE AND CURB KEY KIT

- 367-9101: fits inside 1" pipe of Erie and Minneapolis curb boxes to operate curb box rods
- 367-9102: operates 2-hole lids of Erie and Minneapolis curb boxes
- 367-9103: cleanout auger (details shown below)
- 367-9104: operates small handwheels
- 367-9110: 3-1/2' extension piece

Related Product

CLEANOUT AUGER

- Made to fit our Valve and Curb Key Kits, but can be used with a variety of tools
- Ideal for cleaning out mud and dirt in 5-1/4" valve boxes
- Made of investment cast carbon steel with powder coating
- Snap pin included

VALVE AND CURB BOX CLEANERS

- Heavy-duty tool designed for cleaning out 2-1/2" and 3" Buffalo curb boxes as well as 4-1/4" and 5-1/4" Buffalo valve boxes, without excavation
- Squeeze the lever to open the jaws; release the lever to spring jaw closed
- Available in 5', 6', 7', and 8' lengths
- Replacement jaw kits can be interchanged on tools of other popular manufacturers

SPECIALTY PRODUCTS

for the Waterworks and Valve Industries

As a global manufacturer in the underground waterworks industry, specializing in treatment plant solutions, we have been committed to delivering innovative solutions and high-quality products since 1981. Our comprehensive approach includes full in-house engineering, manufacturing, and assembly operations based in Youngstown, Ohio.

Our team of experts is dedicated to developing cutting edge solutions that address the unique challenges of the industry. We combine our extensive knowledge and experience with a focus on innovation to design and manufacture products that meet the highest standards of quality and reliability.

With our solid infrastructure, state-of-the-art manufacturing facilities, and exceptional customer service, we continue to lead the way in the underground waterworks industry. Our goal is to provide comprehensive solutions that meet the evolving needs of our customers while maintaining the highest standards of excellence and customer satisfaction.
